

OREGON SCHOOL-BASED HEALTH CENTERS 2010 Fact Sheet

The Challenge

In Oregon, approximately 13% or 118,000 children are uninsured.

70% of surveyed SBHC clients reported they would not have received health services that day without the center.

1 in 4 adolescents are at risk for adverse health outcomes such as teen pregnancies, suicide, and substance abuse.

Student health status impacts educational outcomes.

Health care is expensive.

The Benefit

- Recognized as part of the Safety Net system caring for those who are without insurance or are under-insured.
 - 54 Certified School-Based Health Centers (SBHCs)
 - Currently in 20 counties
 - 13 additional sites are in Phase I Planning and will be certified during Spring 2011
 - 1 additional site is in Advanced Phase I Planning and will be certified during Spring 2010
- Estimated \$1,526,000 in health care services delivered to uninsured students in Oregon (SY 2008-2009).

- Served nearly 25,000 students with over 72,000 visits.
- Keeps parents from missing work to take students to health care services.
- Provide easily accessible physical, mental, and preventive health services.

- Reinforces health promotion messages provided in school.
- Surveyed students reported their overall health was better due to their use of the SBHC.
- Developmentally appropriate care is provided by qualified health professionals: nurse practitioners, physician assistants, registered nurses, and mental health counselors.

- Loss of class time is reduced as reported by surveyed clinic users.
 - 49% reported they did not miss a class while using the center services.
 - 80% estimated they would miss one class or more if they had to go to a traditional clinic.

- Value of services provided far exceeds the state dollars spent.
- \$3-4 additional dollars are leveraged through local public-private partnerships for every \$1 of State General Fund invested.
- Recognized by state and local insurance companies as an important and effective piece of healthcare delivery.
